Developing a Joint Research Agenda. There are researches that require more than one person or one team. With respect to that, researches are made jointly. Developing a joint research agenda is not far from a printable agenda. The difference is the scale of people working for it, the objectives of the research that have shifted from short-term to long-term, and the dissemination of the tasks that each team has to complete.

A research agenda is simply a document that orients the researcher about the processes that he or she is to undertake to start and finish a research study properly. It is a list of the items that are needed to be checked every step of the study process so that there are no variables essential in the success of the study to be forgotten.
