Radiation and convection. Heat transfer from a radiator occurs by all the usual mechanisms: thermal radiation, convection into flowing air or liquid, and conduction into the air or liquid. A radiator may even transfer heat by phase change, for example, drying a pair of socks. In practice, the term "radiator" refers to any of a number of devices in which a liquid circulates through exposed pipes ...

I have an SH-35 Suburban installed. It can be used for inside or outside access and costs less if you don't buy the outside access door. The major difference between the SF and SH models is that the SH is a little taller and is supposed to be quieter as the blower is larger in diameter and turns slower.
