

### **brain dynamics an introduction pdf**

The brain is an organ that serves as the center of the nervous system in all vertebrate and most invertebrate animals. The brain is located in the head, usually close to the sensory organs for senses such as vision. The brain is the most complex organ in a vertebrate's body. In a human, the cerebral cortex contains approximately 10–20 billion neurons, and the estimated number of neurons in ...

### **Brain - Wikipedia**

Functional magnetic resonance imaging or functional MRI (fMRI) measures brain activity by detecting changes associated with blood flow. This technique relies on the fact that cerebral blood flow and neuronal activation are coupled. When an area of the brain is in use, blood flow to that region also increases.

Introduction []. Developing a group or team is a useful approach to accomplishing a task. During this discussion the term "group" and "team" are used interchangeably. When developed and run effectively a team can be used to pool the ideas and experiences of its members in search for a collective outcome.
