Introduction To Mathematical Statistics 7th Edition

Graph each of the following probability density functions and show that this measure is smaller for the first distribution. (a) $f(x) = i, -1 \leq x \leq 1$, zero elsewhere. (b) $f(x) = 3(1 - r)^4, -1 \leq x \leq 1$.

However, since the mathematical properties of probability given in Section 1.3 are consistent with either of these interpretations, the subsequent mathematical development does not depend upon which approach is used. The primary purpose of having a mathematical theory of statistics is to provide mathematical models for random experiments.
